

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1. (currently amended): ~~An electronic device~~ A personal computer operation environment presetting system comprising:

a power source voltage list for storing AC power source voltages for each of specified countries;

an input power source voltage detecting unit for detecting an input operable, when a wireless LAN card is mounted therein, to detect the personal computer input AC power source voltage on an electronic device permitting operation in a wireless LAN system;

a country discriminating unit for discriminating the country with the electronic device personal computer present therein according to on the basis of the voltage detected by the input power source voltage detecting unit; and

an operation environment presetting unit for presetting the electronic device to operation environments environment of the wireless LAN card to the operation environment of the country discriminated by referring to the country discriminating unit an operation environment list.

2 -3. (canceled).

4. (currently amended): ~~The electronic device~~ personal computer operation environment presetting system according to ~~one of claims 1 and 2~~ claim 1, ~~which further comprises an individual country wherein the operation environment list, in which stores operation~~

environments preset for ~~specified predetermined countries are stored, and which is referred to by the operation environment presetting unit for presetting the electronic device to the operation environments of the discriminated country.~~

5. (currently amended): The ~~electronic device~~ personal computer operation environment presetting system according to ~~one of claims 1 and 2~~ claim 1, wherein the input power source detecting unit executes the detection by utilizing an AC voltage detecting function of an AC-DC adapter for converting AC voltage to DC voltage used in the electronic device.

6-8. (canceled).

9. (currently amended): ~~An electronic device~~ A personal computer operation environment presetting method comprising:

~~a step of detecting the input AC power source voltage on an electronic device~~ a personal computer;

~~a step of discriminating a country with the electronic device~~ personal computer present therein according to the detected voltage; and

~~a step of presetting the electronic device~~ personal computer to operation environments of the discriminated country.

10. (currently amended): The ~~electronic device~~ personal computer operation environment presetting system of claim 1 wherein the country discriminating unit discriminates

the country with the ~~electronic device~~ personal computer present therein according to only the input power source voltage detected.

11. (canceled).
